

Anza Project: A Robotics & Gardening Magnet School

Elementary is in the Cajon Valley District and serves a diverse population of students, parents, and community groups. I was commissioned by the site Principal to utilize grant money to enhance the environment of the school. Given design and location freedom, I started with several ideas for the board to choose from. The first commission began with a simple, glittering mosaic on the **top of each hallway water fountain**. From that point, the commissions expanded to a “**wall ball**” mural depicting the anatomy of a tree system, a large **Welcome boulder** in the 3-4th grade garden with a donor mosaic planned for the other boulder, and a grouping of **8 giant, mosaic veggies** welded to the kindergarten fence line.

Wildflowers & Water

Tropical Rain & Rainbows

3rd-4th Grade Central Garden Boulder

Kindergarten Fence Line: Giant Mosaic Veggies

Second set of veggies: Handmade tile, glass, vintage tile, and sculptural glass on hand-welded steel forms, welded to fence.

Wall Ball Mural: Anatomy of a Tree
